

The Airport has decided to combine 2 projects previously advertised for Pre-qualification of Contractors for the Year 2018. Both projects involve the parking garage. **“Replacement of Parking Garage Stair Tower Cross-over slabs”** and **“FY 2018 Parking Garage Repairs/Maintenance”** will be combined into a single project **“Parking Garage Joint & Ceiling Repairs & Cross-Over Slabs Replacements”**. Interested contractors must demonstrate the ability to perform both phases of the project in order to be prequalified. Any firms previously pre-qualified for both individual projects will be considered pre-qualified for the new single project and are not required to resubmit pre-qualification packages.

The Airport will accept qualified teams as well as single contractors. Those firms previously pre-qualified for one of the two original projects who are interested in the combined project must resubmit Pre-Qualification Statements by April 3, 2018. Pre-qualification for one of the two original projects will not automatically prequalify you for the combined project.
